

eco-INSTITUT-Label

Certification advantages

Safety

- Safe limit values, which going far beyond the legal requirements
- Extensive pollution control (emissions and content parameters) and additional odour test

Competitive advantage

- Variegated use of the label - e.g. on product packaging, in brochures, on the internet
- Decision guidance for architects, general contractors, planners, builders and consumers choosing a product

Market access

- Easier access to international markets: accepted for many building certification programmes (LEED, DGNB, Breeam)
- Certificate in three languages (German - English - French)

Quality label

- Recommended by independent parties: e.g. WDR Household check, ÖKO-TEST publisher, VERBRAUCHER INITIATIVE e.V. (label-online.de)
- Listed in the sustainable shopping basket (German Council for sustainable Development)

Service

- Support in product optimisation
- Fast certification process and transparent costs
